OFFICE SAFETY

Although office spaces are generally considered to be safe, they can be dangerous environments if a few simple precautions aren't taken. The simple guidelines below will help keep your office safe.

TRIPS, FALLS & COLLISIONS

Ensure
all dangling telephone wires and other cables are housed in cable protectors

Clean up
any spillages as soon as they occur.

OFFICE SAFETY

TRIPS, FALLS & COLLISIONS

Keep
all walkways and hallways clear

Be aware
of any loose carpets, lino or tiles

Always
use a stepladder or foot stool

Walk
around corners slowly

OFFICE SAFETY

TRIPS, FALLS & COLLISIONS

Never
stand on desks or chairs

Do not
leave filing cabinet drawers open

Avoid
the risk of injury when reaching into a desk drawer, keep sharp items such as knives, scissors and drawing pins in a separate container.

Remove
any dangling jewellery, scarves and ties when working around machinery. Also ensure long hair is tied back.

OFFICE SAFETY

OFFICE EQUIPMENT

Ensure
all filling cabinets are secured to each other, the wall or both.

Avoid
injuring fingers, by closing all filling cabinet drawers with the handle

Avoid
top loading. Balance all file loads evenly through cabinet drawers

OFFICE SAFETY

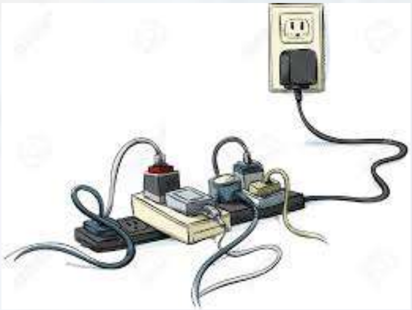
FIRE HAZARDS

Know
the location of fire extinguishers and how they function.

Ensure
that multi-plug extension leads have circuit breakers or install more sockets

Keep
all sources of flame away from waste paper containers

Ensure
you switch off and unplug all electrical equipment not in use



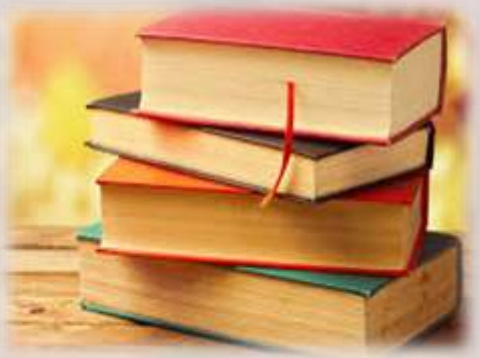
Never
overload electrical sockets

Familiarise
yourself with evacuation routes.

BOOK REVIEW

Fundamentals of Occupational Safety and Health. Seventh Edition

by Mark A. Friend (Author), James P. Kohn (Author)



The seventh edition of this popular handbook provides a thorough and up-to-date overview of the occupational safety and health field and the issues safety professionals face today, and does so in an accessible and engaging manner. An excellent introductory reference for both students and professionals, *Fundamentals of Occupational Safety and Health* provides practical information on technology, management, and regulatory compliance issues, covering crucial topics like organizing, staffing, directing, and evaluating occupational safety programs and procedures.

All major occupational safety and health topics are addressed in this comprehensive volume, including safety-related laws and regulations, hazardous materials, workplace violence, the threat of terrorism, and OSHA's recordkeeping standard. This new edition has been revised and updated throughout to include new information on a variety of topics.

The book includes a handy directory of resources such as safety and health associations, First Responder organizations, and state and federal agencies. The latest edition of this go-to reference work reflects the legal and cultural climate of safety and health in an easily comprehensible and well-organized format, giving readers a wealth of occupational safety and health information right at their fingertips.

Dua kematian setiap hari babit pekerja

Kajian PERKESO, UiTM dapati kemalangan kerap berlaku 5km dari tempat kerja

Oleh Nor Afzan Mohamad Yusof
afzan@bh.com.my

Kuala Lumpur

Dua kematian setiap hari dalam kalangan pekerja sewaktu perjalanan pergi dan pulang ke tempat kerja.

Timbalan Menteri Sumber Manusia, Datuk Mahfuz Omar, berkata daripada 35,195 kes kemalangan tahun lalu, sebanyak 888 kematian dilaporkan, manakala pada 2017, sebanyak 924 kematian daripada 33,319 kes kemalangan.

Beliau berkata, walaupun kes kematian mencatatkan penurunan tetapi kes kemalangan meningkat.

"Kajian dilakukan bersama Pertubuhan Keselamatan Sosial (PERKESO) dan Universiti Teknologi MARA (UiTM) beberapa tahun lalu turut mendapati kemalangan kerap berlaku dalam jarak lima kilometer (km) dari tempat kerja," katanya.

73 peratus nahas babit penunggang motosikal

Beliau berkata demikian pada sidang media Majlis Penyerahan Geran Bantuan Kewangan (PERKESO) 2019 berjumlah RM4.6 juta kepada 33 institusi dan badan bukan kerajaan (NGO) berkaitan keselamatan dan kesihatan pekerjaan, di sini semalam.

Yang turut hadir, Ketua Pegawai Eksekutif PERKESO, Datuk Seri Dr Mohammed Azman Datuk Aziz Mohamad.

Mahfuz berkata, daripada statistik kemalangan, dianggarkan 73 peratus kemalangan tahun lalu membabitkan penunggang motosikal.

Terdahulu dalam ucapannya Mahfuz menyarankan institusi dan NGO tidak menyediakan program 'syok sendiri', sebaliknya memberikan pendekatan terkini sesuai perubahan zaman supaya dapat memanfaatkan kumpulan sasar.

Katanya, usaha menangani penting kerana ia membabitkan kos kepada negara dan masyarakat, sama ada dalam bentuk kehilangan nyawa, hilang upaya atau produktiviti.

"Semua pihak berkaitan perlu menjalankan peranan dalam program pencegahan kemalangan berdasarkan bidang kuasa dan kepakaran masing-masing," katanya.

Kemalangan babitkan pekerja dalam perjalanan pergi-balik ke tempat kerja

Dua maut di jalan raya setiap hari

KUALA LUMPUR – Kira-kira 890 kes kematian dicatat akibat kemalangan jalan raya ketika dalam perjalanan pergi-balik ke tempat kerja pada tahun lepas.

Timbalan Menteri Sumber Manusia, Datuk Mahfuz Omar (**gambar kecil**) berkata, jumlah itu bagaimanapun menunjukkan penurunan berbanding tahun 2017 yang mencatatkan 924 kes kematian.

"Ini bermakna, setiap hari purata dua orang yang pergi kerja tidak pulang semula ke rumah akibat terlibat dalam kemalangan maut," katanya kepada pemberita selepas majlis penyerahan Geran Bantuan Kewangan Pertubuhan Keselamatan Sosial (Perkeso) kepada institusi dan badan pertubuhan bukan kerajaan (NGO) 2019 di sini semalam.

Bagaimanapun, kes kemalangan pergi dan balik ke tempat kerja pada tahun lepas meningkat iaitu 35,195 berbanding 33,319 pada 2017 dengan kira-kira 74 peratus daripada kemalangan itu melibatkan penunggang dan pembonceng motosikal.

"Oleh itu, kita berharap lebih banyak pihak bekerjasama dengan Perkeso dalam melaksanakan program kesedaran kepada golongan pekerja, kita tidak kisah naikkan peruntukan bantuan kewangan asalkan program yang dijalankan memberi kesan positif dan boleh mengurangkan kes kemalangan pergi-balik kerja," ujarnya.

PENUNGGANG motosikal dilaporkan antara pengguna jalan raya paling ramai maut dalam kemalangan termasuk golongan pekerja. – Gambar hiasan

Menurut Mahfuz lagi, pada tahun ini, Perkeso memperuntukkan Geran Bantuan Kewangan kepada 33 institusi dan NGO yang membuat permohonan melibatkan jumlah RM4,643,463.30.

Ia merangkumi 280 program seminar atau kursus, 225 program pencegahan kemalangan perjalanan, 87 khidmat runding cara, dua program penyelidikan dan pembangunan serta dua penerbitan video promosi.

Antara institusi dan NGO yang menerima peruntukan itu ialah Institut Penyelidikan Keselamatan Jalan Raya (Miros), Institut Keselamatan dan Kesihatan Pekerjaan Negara (NIOSH), Kongres Kesatuan Sekerja Malaysia (MTUC) dan Kongres Kesatuan Pekerja Dalam Perkhidmatan Awam (CUEPACS).

Mahfuz menambah, aktiviti pencegahan pada tahun ini juga akan memberi tumpuan kepada pencegahan dalam kalangan golongan pekerja muda serta pekerja asing yang juga pencarum Perkeso mulai 2019. – Bernama

Landslide report blames contractor, MBPP and DOSH

GEORGE TOWN: The special investigative panel report on the Bukit Kukus landslide had not been made public, but excerpts of the findings were made available by the state.

However, it has raised more questions than answers as the state blamed the contractor, Penang Island City Council (MBPP) and the Department of Occupational Safety and Health (DOSH).

In an immediate response, DOSH Penang director Jaafar Leman denied the department was to be blamed for the landslide.

"We were not even invited to be part of the investigative panel to give our views. How could we be blamed?" he asked.

According to the statement by Deputy Chief Minister 1 Datuk Ahmad Zakiyuddin Abdul Rahman who headed the investigative panel, the stop-work order on Oct 17 prevented contractors from entering the site to do maintenance works.

As a result, the temporary toe drain overflowed and water was retained on the reclaimed land contributing to the collapse of the slopes.

"How could a stop order which was issued on Oct 17 contribute to the landslide which occurred on Oct 19?" asked Jaafar.

He said the slopes would have been risky from the beginning as the contractor did not do any mitigation works to strengthen them and it does not make sense to blame DOSH.

The stop-work order was issued on Oct 17 after 14 beams fell in a ravine.

Earlier, during a press conference, Ahmad Zakiyuddin said MBPP and other parties involved in the construction of the Jalan Bukit Kukus paired roads project, had not adhered to construction and engineering best practices.

"The landslide was caused by many factors, which included a temporary construction of a platform to place machinery which was not constructed properly. The temporary platform was created to allow heavy vehicles lift beams for the paired road project.

"MBPP, as owners of the project, had failed to ensure all the hired parties carried out their job.

"MBPP had failed to hire a professional engineer for temporary works to design and supervise the site," he said yesterday.

Ahmad Zakiyuddin said another factor was the downpour in the morning of the day of the landslide.

Penghuni asrama Pusat Tahfiz Tarbiyatun Nisa berlari menyelamatkan diri dalam insiden kebakaran di Kampung Marabahai, Tuaran, semalam.

KEBAKARAN

41 pelajar perempuan sekolah tahfiz sempat selamat diri

Tuaran: Seramai 41 pelajar perempuan di Pusat Tahfiz Tarbiyatun Nisa di Kampung Marabahai, di sini, sempat menyelamatkan diri daripada kebakaran yang memusnahkan asrama mereka, pagi semalam.

Tiada sebarang kecederaan dilaporkan dalam kejadian yang berlaku kira-kira jam 6.50 pagi.

Ketua Balai Bomba dan Penyelamat Tuaran, Abdul Qawie Abdul Gapar, berkata sebaik menerima panggilan kecemasan pada jam 6.58 pagi, seramai 11 anggota dikejarkan ke lokasi bersama dua jentera.

"Sebaik tiba, asrama satu tingkat jenis separuh kekal itu terbakar 100 peratus dan bomba segera menjalankan operasi pemadaman.

"Pada masa sama, pemeriksaan mendapati semua penghuni sudah keluar dan berkumpul di kawasan lapang kira-kira 100 meter dari lokasi kejadian," katanya.

Api marak di tingkat bawah

Sementara itu, pengurus asrama, ustazah Aishah Abdul Halim, berkata kebakaran berlaku selepas sebahagian pelajar selesai menjalani kuliah subuh, manakala beberapa lagi pelajar berada di asrama disebabkan sakit.

"Sebaik semua pelajar itu kembali ke asrama, api mula marak di tingkat bawah menyebabkan salah seorang pelajar menjerit meminta semua penghuni bergegas keluar," katanya.

Menurutnya, antara yang menghuni asrama itu adalah anak yatim dan fakir miskin berusia tujuh hingga 16 tahun dan sesiapa yang berhasrat menghulurkan bantuan, boleh menghubunginya di talian 013-4148833.

Api marak memusnahkan bangunan asrama.

Pekerja kontrak perlu carum PERKESO

BH 8 13/2/19

Kangar: Majikan di negara ini perlu mendaftar dan mencarum pekerja kontrak atau sambilan dengan Pertubuhan Keselamatan Sosial (PERKESO).

Timbalan Menteri Sumber Manusia, Datuk Mahfuz Omar, berkata pihaknya sejak tahun lalu, sudah meminta pekerja berstatus kontrak atau sambilan diwajibkan mencarum dengan PERKESO agar kehidupan mereka lebih terjamin.

"Kita sudah lama tegaskan bahawa mereka (pekerja sambilan) ini perlu dicarumkan demi masa hadapan dan keselamatan pekerja seandainya berlaku perkara yang tidak diingini.

Lapor jika majikan tak carum

"Jadi kita minta agar pekerja yang masih belum dicarum oleh majikan tampil membuat laporan agar kerajaan boleh mengingatkan majikan untuk berbuat demikian (mencarum)," katanya.

Mengulas lanjut, Mahfuz berkata, pihaknya berharap majikan mengambil berat isu itu bagi memastikan keselamatan pekerja terjamin.

"Saya sudah fokus kepada pekerja yang tidak bermajikan atau bekerja sendiri dan selepas ini saya mahu fokus kepada pekerja bermajikan berstatus sambilan atau kontrak," katanya.
