

PUBLIC AWARENESS SEMINAR SERIES 2016

Welcome back to NIOSSH's continuous series of high impact seminars which give more emphasis to implementation rather than just theory.

NIOSSH is again sharing with you the essence of a particular subject matter which is often said of its importance but almost next to impossible to implement. We have carefully selected this particular trainer to deliver the seminar of " Medical Surveillance as a Feedback Loop for Managers and OSH Practitioners" as he has a wide and in depth knowledge and experience in delivering Medical Surveillance from small industries to large companies. Medical Surveillance often is often said to be done because of legal requirements of Section 28 of OSHA 1994 but really it's about saving lives and unnecessary health costs which is of more burden to company and management. Come and experience hands on the sharing of ROI in proper and cost effective delivery of Medical Surveillance in any company, big or small. "Medical Surveillance as a Feedback Loop for MANAGERS and OSH Practitioners" is meant for serious managers and OSH Practitioners who really care for human beings.
